
Contents

PANEL 1: INTRODUCTION	1.xi
A Study of Pressure Losses in Residential Air Distribution Systems	1.1
Bass Abushakra, <i>Lawrence Berkeley National Laboratory</i>	
Iain S. Walker, <i>Lawrence Berkeley National Laboratory</i>	
Max H. Sherman, <i>Lawrence Berkeley National Laboratory</i>	
Laboratory Evaluation of the Delta Q Test for Duct Leakage	1.15
John W. Andrews, <i>Brookhaven National Laboratory</i>	
Pushing the Envelope: A Case Study of Building the First Manufactured Home Using Structural Insulated Panels	1.29
Michael Baechler, <i>Pacific Northwest National Laboratory</i>	
Don Hadley, <i>Pacific Northwest National Laboratory</i>	
Ronald Sparkman, <i>Genesis Homes</i>	
Michael Lubliner, <i>Washington State University, Energy Program</i>	
Measured and Simulated Cooling Performance Comparison: Insulated Concrete Form versus Frame Construction	1.43
Dave Chasar, <i>Florida Solar Energy Center</i>	
Neil Moyer, <i>Florida Solar Energy Center</i>	
Armin F. Rudd, <i>Florida Solar Energy Center</i>	
Danny S. Parker, <i>Florida Solar Energy Center</i>	
Subrato Chandra, <i>Florida Solar Energy Center</i>	
What Can 13,000 Air Conditioners Tell Us?	1.53
Tom Downey, <i>Proctor Engineering Group, Ltd.</i>	
John Proctor, <i>Proctor Engineering Group, Ltd.</i>	
Field Performance of Two New Residential Duct Leakage Measurement Techniques	1.69
Paul W. Francisco, <i>Ecotope, Inc.</i>	
Larry Palmiter, <i>Ecotope, Inc.</i>	
Bob Davis, <i>Ecotope, Inc.</i>	
An Innovative Approach to Reducing Duct Heat Gains for a Production Builder in a Hot and Humid Climate: How We Got There	1.81
Dianne Griffiths, <i>Steven Winter Associates, Inc.</i>	
Robb Aldrich, <i>Steven Winter Associates, Inc.</i>	
William Zoeller, <i>Steven Winter Associates, Inc.</i>	
Marc Zuluaga, <i>Steven Winter Associates, Inc.</i>	

Diagnostic Performance Assessment of 30 New California Homes	1.91
<i>Marc Hoeschele, Davis Energy Group, Inc.</i> <i>Rick Chitwood, Chitwood Energy Management</i> <i>Bill Pennington, California Energy Commission</i>	
A Yardstick Consumers Use to Measure Home Energy Performances	1.103
<i>Dale Hoffmeyer, U.S. Environmental Protection Agency</i>	
Washington State Residential Ventilation and Indoor Air Quality Code (VIAQ): Whole House Ventilation Systems Field Research Report	1.115
<i>Michael Lubliner, Washington State University Energy Program</i> <i>Rick Kunkle, Washington State University Energy Program</i> <i>John Devine, U.S. Department of Energy</i> <i>Andrew Gordon, Washington State University Energy Program</i>	
Residential Hot Water Distribution Systems: Roundtable Session	1.131
<i>James D. Lutz, Lawrence Berkeley National Laboratory</i> <i>Gary Klein, California Energy Commission</i> <i>David Springer, Davis Energy Group, Inc.</i> <i>Bion D. Howard, Building Environmental Science and Technology</i>	
Do ENERGY STAR® Homes Live Up to their Promoted Energy Savings? A Comparison of Utility Bill Data for Recently Built ENERGY STAR and Control Homes in Alachua County, Florida	1.145
<i>Eric Martin, Florida Solar Energy Center</i> <i>Robin Vieira, Florida Solar Energy Center</i> <i>Brian Hanson, Florida Solar Energy Center</i> <i>Jeffrey K. Sonne, Florida Solar Energy Center</i> <i>Pierce Jones, University of Florida</i> <i>Kik Koppitch, Gainesville Regional Utilities</i> <i>Sherman Phillips, Clay Electric Cooperative, Inc.</i> <i>Tom Gumber, Clay Electric Cooperative, Inc.</i>	
Factors Influencing Water Heating Energy Use and Peak Demand in a Large Scale Residential Monitoring Study	1.157
<i>John A. Masiello, Florida Power Corporation</i> <i>Danny S. Parker, Florida Solar Energy Center</i>	
High Hats, Swiss Cheese, and Fluorescent Lighting?	1.171
<i>Jeff J. McCullough, Pacific Northwest National Laboratory</i> <i>Kelly L. Gordon, Pacific Northwest National Laboratory</i>	

The Development of a Frost-Less Heat Pump	1.183
V.C. Mei, <i>Oak Ridge National Laboratory</i>	
R.E. Domitrovic, <i>Oak Ridge National Laboratory</i>	
F.C. Chen, <i>Oak Ridge National Laboratory</i>	
J.K. Kilpatrick, <i>Tennessee Valley Authority</i>	
Cool Color Roofs with Complex Inorganic Color Pigments	1.195
William A. Miller, <i>Oak Ridge National Laboratory</i>	
Kenneth T. Loye, <i>FERRO Corporation</i>	
André O. Desjarlais, <i>Oak Ridge National Laboratory</i>	
Robert P. Blonski, <i>FERRO Corporation</i>	
Measuring Duct Leakage with a Blower Door: Field Results	1.207
Larry Palmiter, <i>Ecotope, Inc.</i>	
Paul W. Francisco, <i>Ecotope, Inc.</i>	
Comparative Evaluation of the Impact of Roofing Systems on Residential Cooling Energy Demand in Florida	1.219
Danny S. Parker, <i>Florida Solar Energy Center</i>	
Jeffrey K. Sonne, <i>Florida Solar Energy Center</i>	
John R. Sherwin, <i>Florida Solar Energy Center</i>	
How Insulating Concrete Form vs. Conventional Construction of Exterior Walls Affects Whole Building Energy Consumption: Results from a Field Study and Simulation of Side-by-Side Houses	1.235
Thomas W. Petrie, <i>Oak Ridge National Laboratory</i>	
Jan Kosny, <i>Oak Ridge National Laboratory</i>	
André O. Desjarlais, <i>Oak Ridge National Laboratory</i>	
Jerald A. Atchley, <i>Oak Ridge National Laboratory</i>	
Phillip W. Childs, <i>Oak Ridge National Laboratory</i>	
Mark P. Ternes, <i>Oak Ridge National Laboratory</i>	
Jeffrey E. Christian, <i>Oak Ridge National Laboratory</i>	
Ventilation Performance in Wisconsin ENERGY STAR® Homes	1.247
Scott Pigg, <i>Energy Center of Wisconsin</i>	
Edward Carroll, <i>Wisconsin Energy Conservation Corporation</i>	
Gregory Nahn, <i>Wisconsin Energy Conservation Corporation</i>	
Joseph Nagan, <i>Home Building Technology Services</i>	
Residential HVAC Fans and Motors Are Bigger than Refrigerators	1.261
Harvey M. Sachs, <i>American Council for an Energy-Efficient Economy</i>	
Toru Kubo, <i>American Council for an Energy-Efficient Economy</i>	
Sandy Smith, <i>American Council for an Energy-Efficient Economy</i>	
Kalon Scott, <i>American Council for an Energy-Efficient Economy</i>	

Measured Performance of California Buydown Program Residential PV Systems	1.273
Kurt Scheuermann, <i>Regional Economic Research, Inc.</i>	
Doug Boleyn, <i>Regional Economic Research, Inc.</i>	
Patrick Lilly, <i>Regional Economic Research, Inc.</i>	
Sanford Miller, <i>California Energy Commission</i>	
Dirty Air Conditioners: Energy Implications of Coil Fouling	1.287
Jeffrey Siegel, <i>Lawrence Berkeley National Laboratory/University of California, Berkeley</i>	
Iain S. Walker, <i>Lawrence Berkeley National Laboratory</i>	
Max H. Sherman, <i>Lawrence Berkeley National Laboratory</i>	
The Measured Impacts of Air Conditioner Condenser Shading	1.301
Jeffrey K. Sonne, <i>Florida Solar Energy Center</i>	
Danny S. Parker, <i>Florida Solar Energy Center</i>	
Stephen F. Barkaszi, Jr. <i>Florida Solar Energy Center</i>	
Field Test of Aerosol-Spray and Best-Practice Duct-Sealing Approaches	1.313
Mark P. Ternes, <i>Oak Ridge National Laboratory</i>	
Ho-Ling Hwang, <i>Oak Ridge National Laboratory</i>	
The Delta Q Method of Testing the Air Leakage of Ducts	1.327
Iain S. Walker, <i>Lawrence Berkeley National Laboratory</i>	
D.J. Dickerhoff, <i>Lawrence Berkeley National Laboratory</i>	
Max H. Sherman, <i>Lawrence Berkeley National Laboratory</i>	
Accuracy of Flow Hoods in Residential Applications	1.339
Craig Wray, <i>Lawrence Berkeley National Laboratory</i>	
Iain S. Walker, <i>Lawrence Berkeley National Laboratory</i>	
Max H. Sherman, <i>Lawrence Berkeley National Laboratory</i>
