# BC's Comprehensive Approach to Larger Targets

- BC Hydro mandated to **meet at least 66%** of future load growth with DSM by 2020.
- Current plan targets over 75% of future load growth.
- One innovative approach is through Conservation rate structures which make up **~ 20%** of savings in 2020.

## Conservation Rate Structures

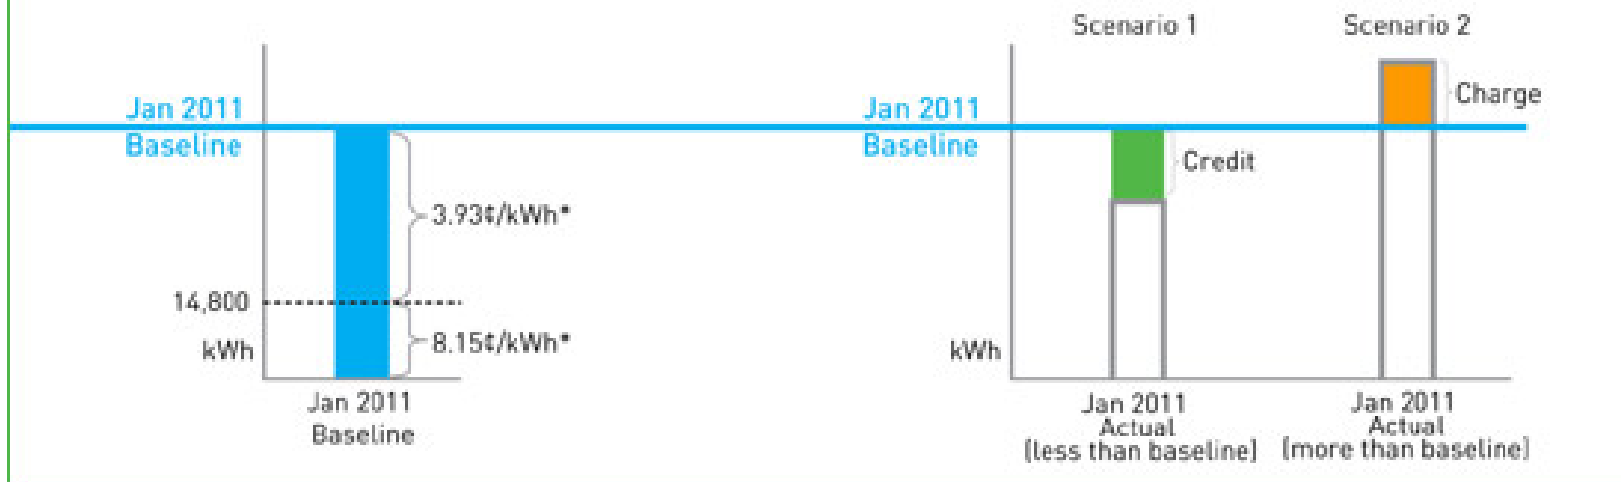

- Residential rate
- Large Commercial/small industrial rate
- Large Industrial rate

# Large Commercial Rate

## THE ENERGY CHARGE ON YOUR BILL:

PART 1: BASELINE CHARGE + PART 2: CREDIT OR CHARGE

### Planning and Policy Considerations:

- Integration between estimates of Program and Rate structure savings in DSM planning
- Attribution of savings between Rate and Program

Thank you
