Volkswagen	Jetta Sportwagen	Diesel	Car	30	2,221	Pass	\$	1,300 <sup>d</sup>
Volkswagen	Touareg	Diesel	SUV	18	2,629	Pass	\$	1,150 <sup>d</sup>

**Upcoming Models<sup>f</sup>**

Make	Model	Fuel Type	Vehicle Class	Adjusted City MPG	Fuel Saved (gal)	Emissions Pass/Fail	Performance Credit	Projected Credit
Honda	CR-Z	Hybrid	Car	36	1,768	Pass	\$ 1,050	\$ -
Porsche	Cayenne	Hybrid	SUV	28	5,804	Pass	\$ 3,400	\$ 3,400

**Upcoming Electric Vehicles**

Make	Model	Fuel Type	Vehicle Class	Battery Size (kwh)	Fuel Saved (gal)	Emissions Pass/Fail	Technology Credit <sup>g</sup>	Projected Technology Credit
Chevrolet	Volt	Electric	Car	16	-	Pass	\$ 7,500	\$ 7,500 <sup>d</sup>
Nissan	Leaf	Electric	Car	24	-	Pass	\$ 7,500	\$ 7,500 <sup>d</sup>

**Notes:**

Last updated Sept 10, 2010

- a. "Performance Credit" indicates the tax credit initially available -- based on the vehicle's performance -- in the cases in which manufacturer sales volumes have triggered a phase-down of the credit. See [www.aceee.org/transportation/hyblaxcred.htm](http://www.aceee.org/transportation/hyblaxcred.htm) for more information.
- b. "Current Credit" indicates the eligible credit for purchases made today. This value reflects applicable sales volume-related reductions in credit value.
- c. "Adjusted City MPG" for 2008, 2009, 2010 and 2011 models reflects changes in EPA's fuel economy estimates.
- d. Tax credit amount has been certified by automaker and acknowledged by the Internal Revenue Service.
- e. Criteria for alternative fuel vehicle tax credits are different from criteria for hybrid and diesel credits.
- f. Specifications and credits for these vehicles are estimated based on currently available information.
- g. Electric vehicles earn a "technology credit" that is based on battery size. To qualify, a plug-in hybrid must have a battery of at least 4 kilowatt-hours, which brings a credit of \$2,500. Each kilowatt-hour of battery above this adds \$417 to the credit, up to a maximum of \$7,500 for light-duty vehicles.
