2026 Conferences

2026 Hot Water Forum & Hot Air Forum

Phoenix, AZ | March 21–26

The 2026 Hot Air and Hot Water Forums are the nation's premier policy and technical conferences devoted to heating energy market transformation. Since their founding in 2008 (Hot Water) and 2023 (Hot Air), the Forums are the place to exchange knowledge on efficiently producing, distributing, and using hot water and decarbonizing space heating.

Past attendees noted that it is “the only national level conference focused on heat pumps”, a “must attend conference” for manufacturers, and a “great event to network and meet other stakeholders in the energy efficiency industry.” Whether your focus is on technology, policy, or programs, the Forums are a key opportunity to share your efficient heating innovations.

2026 Summer Study on Energy Efficiency in Buildings

Pacific Grove, CA | August 2–7

The 2026 Summer Study on Energy Efficiency in Buildings will bring together professionals from around the globe to the Asilomar Conference Grounds to share research, spark new ideas and collaborations, and advance the technologies and practices needed to transform the building sector to improve efficiency, affordability, and resiliency.

2026 Energy Efficiency Policy Forum

Location TBD | Winter 2026

The Energy Efficiency Policy Forum will convene experts and leaders from across government, industry, and advocacy to assess the current landscape of federal energy efficiency policies, explore ways to strengthen and expand these efforts, and discuss how to address potential challenges ahead.
