

Panel 14: Poster Display Presentations

Panel 14 leverages various media, including videos, posters, software programs, and other graphical displays, to tell the story of how efficient, clean energy future is supported. It will focus on content related to building energy efficiency in all sectors and across all fuel types. The panel will address design, construction, or operations, and seeks to span the spectrum of building sizes and functions. The panel offers presentations with rich visuals and graphics and an opportunity to engage with conference attendees in one-on-one or small group discussions, promoting in-depth conversations.
