

RANK:

39 ▲

Georgia ranked 39th in the 2022 State Energy Efficiency Scorecard, scoring 6.5 points out of 50.

2022 STATE ENERGY EFFICIENCY SCORECARD

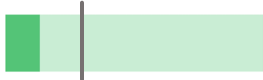

GEORGIA

Georgia continues to report below-average levels of electricity savings. The state has performance incentives for utilities, which help to encourage some investment in energy efficiency. It also considers the proximity of transit facilities when distributing federal Low-Income Housing Tax Credits to qualifying property owners. While the state has more electric vehicles (EV) registered per capita than most states, its burdensome EV registration fee is among the highest in the United States and impedes consumer EV adoption. Focusing on efficiency policies across the buildings, state government, and industrial sectors could significantly improve Georgia's standing in the *State Scorecard*.

SCORES BY POLICY AREA

State score: Remaining possible points: National median score: | _____

Utilities:
2/15 points

Transportation:
2/13 points

Building Policies:
2/12 points

Industry:
0/2.5 points

Appliance Standards:
0/3 points

State-Led Initiatives:
0.5/4.5 points

EQUITY METRICS

How did Georgia incorporate equity across all efficiency policy areas?

- Points for efforts to advance equity within efficiency policies and programs
- Remaining points possible
